Carbon Offsetting

Given the scope and severity of climate change, and the mission of Global Ocean Acidification Observing Network (GOA-ON), the 4th GOA-ON International Workshop Organizing Committee has taken steps to ensure the workshop does not become “part of the problem”, but should lead the addressing of climate change and ocean acidification. We encourage all registrations, particularly those who are from developed countries or regions, to include a voluntary contribution (\$25 or ¥200) to a carbon offsetting project in China.

Please refer to Carbon Offsetting (<http://www.goa-on2019.com/en/carbon.html>) for more information. The carbon offsetting project in China supported by the carbon offsetting donations will be announced in the future. Check back there for updates!
